CRAWL SPACE

Air leaking into the house (blue arrow)

Air leaking out of the house (orange arrow)

1. Have Clarke & Rush perform an Energy Audit of your home for just \$99.

This in-depth inspection scientifically tests your home's performance to locate energy loss. We provide you with options, costs and a customized solution to save you money every month.

2. Make energy upgrades to your home.

Use the home assessment results to choose and complete necessary upgrades to improve your home's energy performance. If you decide to move forward with these recommended improvements, we credit you back the \$99 Energy Audit Fee.

3. Receive rebates for energy-saving upgrades.

The more energy saving improvements you make, the more money you qualify to save through rebates and lower energy bills. (This program is set to end on March 31, 2012 or when the rebate \$\$'s run out, so act soon!)
